

Alchemy of Leadership

CHINA

A Life-Changing Journey

2020

ALCHEMY OF LEADERSHIP CHINA

“ *Embrace your full potential
as a human being and as a leader* ”

This unique leadership journey is an invitation to embrace the full potential of **YOU** as a human being and a leader, but also to investigate and experience how a company that has **the power of a natural ecosystem** would function.

This trip is not open for everybody. A clear selection procedure is made. It is open for active, open-minded leaders who have already made some steps in self-development, are open for the unknown and ready to explore how to contribute actively to **a better future world**.

The journey brings you also **deep into the heart of Taoism**. Taoism is the way of nature. Different then in the West, this ancient spiritual system remained **unspoiled for thousands of years**.

We will visit holy mountains and temples, where several Taoist Masters will share their wisdom with us. We will sometimes sleep in luxury hotels, but most of the times in Taoist temples and caves.

Knowing that most of these places are not open for the public and Taoist are careful to who they speak makes the trip even more unique.

“

The China Journey has put together the pieces of my puzzle in an unpredictable and magnificent way. Crystallisation of my mission and growth in leadership by surrendering to and trusting in nature are continuing till this present day...

Wouter Torfs (CEO Torfs shoes - 10x best employer in Belgium)

”

The power of this journey lies in visiting **strong power places, meeting extraordinary, breathtaking nature**, the interaction between the participants, the constant reflection between nature, the principles of alchemy and your life as a man/woman and a leader.

But this is more than a 10 days journey. It is rather **a 6 months transformation process** where introspection and integration will be essential.

About 3 months before we start the journey we will have a **kick-off meeting** and scan of the participant, looking at the individual state of being, the quality of your life and the energetics in your work.

We will show you how these are all interrelated. At the end of the trip we will organize **an outtake meeting** helping you to integrate what you have learned in your leadership and your organization.

Data: May 3th till May 12th 2020
