

ALCHEMY OF LEADERSHIP TO “PAYS CATHARE”

The whole region and the journey breathe the mystique of the holy grail. Rennes le Chateau and Monsegur belong to the world's top places around the entire holy grail mystery and the primordial Christian consciousness. A region with many places of power that were used by all peoples who lived here for the past thousands of years. Discovering these places of power also brings you to forces within yourself and allows you to use these forces of nature in your work and your life. The initiations are also always linked to themes that leaders, consultants and coaches are confronted with on a daily basis.

The themes for this journey are:

1. Your shadow and inner beauty

We descend deep into one of the most beautiful crystal caves in Europe "Grottes de Aguzou" led by Phillippe Moreno. Philippe takes us to unique places. Here you can sink deep into the Yin in the middle of the kilometer-long crystal field. Deep in the heart of the mountain you always first come into contact with your shadow side and often the accompanying fears, but it also gives you the chance to awaken your inner light. As if you are a crystal yourself. The discovery of this inner structure with its subtle light gives a sense of natural connection with the structure of the earth and the entire cosmos. It brings your self-awareness, tranquility, stability and unconditionality to your path.

2. What leads the leader?

A second place we visit, which is the natural opposite of the first, is the castle of Peyrepertuse. As far as I am concerned, the most powerful Cathar castle built on a place of power, formed by a heavenly and an earthly energy vortex. The theme here is to be guided by the cosmic will, connected with the roots and intelligence of our western spirituality. The feeling of being led is like a blessing on the path of the leader. It gives you confidence and vision on your path.

3. Surrendering and the courage of not knowing

The ideal place for this is the Labyrinth of Nebias: A magical, fairy-tale-like place where you indeed... get lost. Nebias is a place where the natural spirits take you out of your old structure and let you experience reality in a different way. Really not knowing anymore is something that many leaders and coaches struggle with. This place can help you with that.

4. Rediscovering the purity of your heart

For this we visit the Ermitage de Galamus. A sacred cave where a Christian hermit once lived. A mysterious place where religious and natural energies merge.

These are possible visiting places during the trip. The final journey and activities depend on the group, the weather and what is really needed at that time.
